Final Project

User Story

Users will be able to search any type of movies from our database. They will be able to type in any movie names and pull up the year the movie was released, genre of the movie, and what the movie was rated. And if the movie is not available, then the administrators can go in and add that movie. Administrators will be able to add, edit, and update movies in the database.

Database Design (ER Diagram)

Prototype

The prototype is a web application window titled 'Find That Movie'. It features a 'Login' button in the top right corner. The main content area is a light gray rectangle with a white search form in the center. The form contains the following fields and controls:

- Movie name:
- Year released:
- Rating:
- Genre:
-
